OBJECTIVE

AWS-certified Computer Science undergraduate building production-grade Generative AI systems — LLMs, RAG, and multi-agent orchestration — in Python, FastAPI, LangChain, and LangGraph.
Fluent in agentic developer tooling (Claude Code, MCP servers, custom skills) to ship and audit AI systems end-to-end.
Seeking an entry-level AI Engineer role.

EDUCATION

Bachelor of Technology in Computer Science and Engineering	CGPA: 8.57/10
<i>Krishna Institute of Engineering & Technology, Delhi-NCR</i>	2024 – 2028
Senior Secondary (CBSE)	Percentage: 86%
<i>Elpis Global School, Biswan</i>	2022 – 2023

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, C, SQL, FastAPI, LangChain, LangGraph, PyTorch, TensorFlow, Scikit-Learn, React
Core CS: DBMS (SQL, Indexing, Normalization, Transactions), Operating Systems (Linux – Process Management, Memory Management, File Systems, Shell Scripting), Computer Networks (TCP/IP, HTTP/HTTPS, DNS, REST)
AI/ML & Agentic: LLMs, RAG, Multi-Agent Systems, Deep Learning, NLP, Computer Vision, Claude Code (custom skills, subagents, hooks, CLAUDE.md context engineering), Claude Agent SDK, MCP Servers
Cloud & Tools: AWS, GCP (Vertex AI, Cloud Run, BigQuery), Azure Container Apps, Docker, Git, CI/CD, REST APIs, Microservices, Vector DBs (ChromaDB, MongoDB Atlas)

PROJECTS

- Yojna Setu – AI Government Scheme Assistant** | [Demo](#) Feb 2026 – Present | Team
- **Developed** a multilingual conversational assistant (FastAPI, Spring Boot, React, LangGraph, MongoDB Atlas Vector Search) spanning **4,900+ government schemes** across **6 Indian languages**, orchestrated by a **13-agent LangGraph** architecture with a criteria-by-criteria eligibility rules engine.
 - **Engineered** local-vision OCR document ingestion (Jan-Sahayak Lens) and a real-time Pipecat + Sarvam AI (Saaras v3 STT, Bulbul v3 TTS) voice pipeline, deployed on Azure Container Apps via Docker, secured with AES-256 field encryption and prompt-injection guards for DPDP Act 2023 compliance.
- VEDA – Venture Evaluation and Due Diligence Agent** | [Demo](#) Mar – Apr 2026 | Individual
- **Spearheaded** a multi-agent system (Vertex AI, Gemini 2.5 Flash, FastAPI, MCP, BigQuery) on Google Cloud Run that compressed M&A due-diligence processing from **6–12 weeks to under 5 minutes**.
 - **Architected** an asynchronous 6-agent pipeline across 10 GCP services for code audits and regulatory checks, with a Deal Intelligence Layer (Vertex Embeddings + NL API) generating a 0–100 investment score.
- SignEase – Real-Time ASL Recognition System** Nov 2025 | Team
- **Built** a Chrome extension for bidirectional ASL↔speech translation on video calls (PyTorch, MediaPipe, FastAPI) with **98.66%** letter and **80.94%** word accuracy via on-device hand-tracking.
 - **Diagnosed** a handedness-mislabeling bug crashing word accuracy to 5.83%, and shipped multi-tier Sarvam/Piper TTS-STT with automatic local fallback.

ACHIEVEMENTS AND CERTIFICATIONS

Smart India Hackathon 2026 – Finalist: Selected as a finalist with Yojna Sarthi, a 13-agent multilingual government scheme assistant.

Co-Curricular: Google Cloud Gen AI Academy APAC 2026 – **Top 50 across Asia** (VEDA, 6-agent M&A system, 10 GCP services); Hakaccino4 Hackathon 2026 – shipped NaviX (AI risk navigator) within 24 hours.

Certifications: Gen AI Academy Elite Club (2026) | AWS ML Engineering Associate (2026) | AWS AI Practitioner (2026) | AWS Cloud Practitioner (2026) | Cisco Networking Academy (2026) | Python, SQL & ML – Codebasics (2025).

Competitive Coding: LeetCode – **500+ problems solved**, ranked in the top **15%** globally.
